

## **Framework Used**

### **NIST Cybersecurity Framework (CSF)**

**The NIST CSF has five core functions:**

- 1. Identify – Understand the organization's systems, assets, and risks**
- 2. Protect – Implement safeguards to limit or contain cyber events**
- 3. Detect – Develop activities to identify cybersecurity incidents**
- 4. Respond – Take action after a cybersecurity incident occurs**
- 5. Recover – Maintain resilience and restore capabilities**
